
Teknofibra® Heat Tape

Short Description

Teknofibra® Heat Tape

Description

Teknofibra® tape is a very lightweight material, heat reflecting, heat absorbing, sound absorbing fabric. It is supplied with a heat reflecting foil layer and a high temperature self adhesive backing capable of withstanding 250°C. This unique material protects parts mounted in close proximity to high temperatures, that would otherwise be damaged without proper protection. The tape can easily be cut to size and shape with sharp scissors.
