

SFI 14-1 Blower Restraints

Description

SFI 14-1 Blower Restraints (DJ141000)

DJ Safety manufactures these blower restraints to suit carb* and injected inducted supercharges. These restraints have an opening in the top plate to suit either a Bugcatcher or Birdcatcher with an opening of 12.25" x 4.00". The straps are covered in silver fire resistant material and are available in various lengths to suit different motors.

These will suit almost all sportsman drag racing classes that require the SFI 14.1 Spec. This includes most supercharged outlaw cars, comp and group 3 vehicles.

The restraints come complete with all mounting hardware and ready to install. *Carb applications may require two extra holes to be drilled in the plate to adapt to certain manifolds.

Custom made restraints are available by special order, with straps available in a choice of colours. Please contact us for details.

Part Number	Description	Strap Length
DJ141000.13	Blower Restraint SB Motors	13"
DJ141000.15	Blower Restraint SB Motors	15"
DJ141000.18	Blower Restraint SB & BB Motors	18"
DJ141000.21	Blower Restraint BB Motors	21"
DJ141000.24	Blower Restraint Hemi & BB Motors	24"

Strap length is measured from the top of the supercharger to approx the outside edge at the base of the valve cover.
